

Innovating Your Sound

# ROCKMOD III

TUBE PREAMP

The ROCKMOD Preamp is an all-tube preamp housed in a compact, lightweight, and durable aluminum chassis that features three channels with individual EQ sections. The flexible tube-buffered effects loop is switchable between series or parallel operation. A foot switchable boost is available on the Burn, Crunch and Clean channels. The preamp can be switched via a foot switch or MIDI controller.

The ROCKMOD is a totally professional piece of equipment; hand crafted in the U.S.A. using high-quality components. It's unique, versatile, and cleverly designed circuit makes it an indispensable tool on the stage and in the studio. Discerning guitarists that know great tone when they hear it will instantly recognize the ROCKMOD as a truly world-class preamp.

## ROCKMOD III Channel Description

The BURN channel produces a huge amount of articulate and musical gain with an ability to retain its openness and dynamics. Every note played is easily tracked with excellent clarity and rich harmonics that explode across the entire fret board. With the Post-Gain knob, all amounts of saturation can be controlled, from light to heavy.

The CRUNCH channel has that unmistakably British-flavored bark and growl that is tight, grinding, and totally classic rock. Vintage and "modified" amp sounds are available for full-bodied chunky rhythms and stringy, bluesy solos. From low to high-gain tones, they are all here in this very versatile channel.

The CLEAN channel is rich and full-bodied with a beautiful, crystal clear tone with notes that jump out and snap with a detailed and articulate voice. A variety of tones are possible, from "super clean with high headroom," to "edgy and pushed, dirty-clean" sounds.

### QUALITY DESIGN

### Specification

#### Input:

Inst: 1 meg ohm

#### Hum+Noise:

Better than -60db

#### Eq Per Channel:

Treble, Mid, Bass

#### Power:

120VAC 60/50Hz stock - International  
(made to order)

**Dimensions** - 17"W x 9.5"D x 3" H

#### Out put:

@20mV Input (ref. 0 db)  
Burn Channel - 45db  
Crunch Channel - 45db  
Clean Channel - 50db

### Features

- All tube design with (6)-12AX7A
- Burn, Crunch and Clean channels
- Independent EQ for each channel
- Switching series/parallel tube buffered effects loop
- Boost function for Burn, Crunch and Clean channels
- Channel switching via front panel, foot switch and remote switching system
- Weight - 8.5 lbs (3.86 Kg)

### Options

- MIDI Control for all switching functions
- Built in 5W or 8W power amp with EL84s
- Custom head cabinet with many styles and colors of tolex's
- 4 Channel Foot Switch
- Custom channel voicing
